

Giant Trees

Known the world over, our Rocky Mountain Pine Trees are displayed throughout Europe, The Middle East, South America, The Pacific Rim, and even featured in Moscow's Red Square.

Customers use the Rocky Mountain Pine to design creative indoor and outdoor events such as Santa's Home and Santa's Photo Shop, along with a variety of walk-through events that actually take visitors inside the tree.

With a bit of imagination, suddenly anything becomes practical.

We can make a Rocky Mountain Pine Tree specially for you!

Made with 60%
Recycled Steel and
over 90% Recyclable.
A truly **GREEN** tree

The Rocky Mountain Pine Tree is easy to assemble, no matter the height. The largest tree built to date: 110' tall
20,500 lights
26 miles of garland
And it can be fully assembled using only hand tools. Rocky Mountain Pine trees can "grow" over the years in 2' increments by adding more ring levels each year. No modifications needed to the existing tree. Just buy the next levels and assemble the tree as normal.

An infinite number of looks can be created by using different lighting, ornament, and tree topper combinations.

It's Easy!
It's Fun! Just 5 easy steps to ...

5 Add Extra Elements ...

All of our trees can be elevated with a decorative tree box. Several designs are available or we can custom design one just for you.

We also offer Spiral Garland Trees and Trees of Lights

Our spiral construction allows the center pole to be removed and the garland tree to collapse for easy storage. They are available in regular cut garlands in a variety of colors, or branch garland for a more natural look.

Our "Tree of Lights" is built using the same construction for easy storage and installation.
